of customers prefer Aplos Support to competitors

93%

of users recommend Aplos

97%

of customers prefer doing business with Aplos

**statistics from the 2025 G2 Momentum Leader report*

Fund accounting software won't improve your nonprofit finances. Intentional fund management will.

Transform your fund tracking

Nonprofits and faith-based organizations that use Aplos love how easy it is to track their grant and program spending with precision, while maintaining compliance.

"I support two churches with Aplos. Both have donor-restricted funds that need to be tracked. One also requires tracking by program, and also has projects and events to track. Aplos' fund accounting, tags, and integration with PEX Card and Gusto Payroll make this easy."

Gordon C.
Assistant Teaching Professor of Accounting

Visualize your nonprofit spend

Preparing for board meetings, audits, and internal reviews is less of a lift with pre-built and customizable reports in Aplos, that were developed with nonprofits in mind.

"The ability to report by department is awesome and has really helped our department heads to manage their budgets more efficiently. Our annual audit has been much easier since we can pull the information needed very easily from Aplos."

Kassie B.
Finance Manager
